

Two Ways Mentoring Program

Employment Support

We provide guidance and support for individuals who wish to enter the workforce and have a psychosocial disability, have recently suffered from hardship, or mental ill-health. This includes part-time, full-time, or casual work.

Upskilling

We can support individuals with accessing appropriate courses and training that can support them on their employment journey and to improve on their skills.

Volunteering

Seeking out positions of volunteering, within and outside of the community services sector, can be very fulfilling for participants with a psychosocial disability.

Mental Health Promotion

We actively promote the importance of mental health and reducing stigma in the workplace, specifically within local businesses in the Top End.

TeamHEALTH actively promotes and supports an inclusive and diverse culture.

We welcome all people between the ages of 16-64, regardless of gender, race, ability, sexual orientation, faith, religion and all other identities represented in our community.

Support is regularly offered face-to-face or over the phone.

We accept referrals from all sources, including self-referral.
